NEW

EventStore

event-store.ts (NEW)

23 tests

- Append-only event log
- Cursor-based pagination
- layer / severity / action filters
- sequenceId linking
- summarizeSequence() (Toru-William)
- Tenant isolation (ADR-005)
- Independent seq# per tenant

PolicyStore

policy-store.ts (NEW)

7 tests

- Default ENTERPRISE_STRICT
- Zod + consistency validation
- Per-tenant active policy
- Change history (last 10)
- policy:changed event emission
- Isolated per tenant
- Reset to default

TenantDetectorRegistry

tenant-registry.ts (NEW)

8 tests

- One GateDetector per PARTNER_ID
- PremiseDetector per tenant
- AuthorityDetector per tenant
- ContinuityDetector per tenant
- DetectionRegistry per tenant
- MTTD stats per layer
- Tracks active tenant count

detect*()

scoring / verdict

@ncaos/core · Phase 01 · 47 tests

detectGate()

Gate anomaly detection

Verdict enforcement

failSafeVerdict()

ADR-002 fail-safe

loadPolicy()

Policy parsing

FIXES APPLIED (7)

- F-01 vitest config — @ncaos/detection alias
- F-02 judge.ts — workflowId in JudgmentResult
- F-03 enforcer.ts — workflowId → GovEvent
- F-04 package.json — missing comma in workspaces
- F-05 @types/ws — transitive dep install
- F-06 exactOptionalPropertyTypes TS2379
- F-07 start script — dist/index→dist/server
