React Admin Terminal (@ncaos/ui)

@ncaos/ui · Phase 05 · React 18 + Vite + TanStack Query + Recharts · Manual Tests UI-01→08

Vite Dev Server :5173 → proxy /v1/* → http://localhost:3000 | ui/vite.config.ts

SOC OPERATOR

UI-02

Active Containment

- Active event card
- Integrity card (score bar)
- Authority card
- Event log + layer/sev filters
- MTTD SLA panel (p50 bars)

App.tsx

Root terminal, role tabs, topbar

ARCHITECT

UI-04

Shell Integrity

- Shell status + fail-safe
- Core isolation %
- Latency overhead ms
- Continuity state panel
- MTTD expanded (p95/p99/breach)

DashboardPanel.tsx

Integrity · Authority · Active Event cards

AUDITOR

UI-05

Evidence Trail

- Full event log
- Evidence stats panel
- Policy panel (STRICT-PROD)
- Sequence panel (click EVD-...■)
- DOWNGRADE→BLOCK chain viz

EventLog.tsx

EventLog · MttPanel · SequencePanel · PolicyPanel · ContainmentChart

EXECUTIVE

UI-06

Risk Overview

- System status card
- Integrity + score bar
- RAW vs GOVERNED bars
- Drift pressure bar
- LineChart: last 20 events

api.ts (lib)

14 typed fetch wrappers + WebSocket /v1/state/stream

AuditSignal.parse()

AuditSignal Schema · Toru-William Interface Contract · ADR-006 · audit-signal/src/audit-signal.ts · Zod v3

CORE LAYER

AS-01

Always present — every event

14 fields

- evidenceHandle
- layer
- action
- integrityScore
- routingHint
- detectedAt
- policyProfileId
- sequenceNumber
- severity
- authority
- detectionMode
- mttdMs
- storedAt
- partnerId

evidenceLevel(core only)

MODERATE

WEAK / MODERATE / STRONG

evidenceLevel(core+seq)

STRONG

SEQUENCE LAYER

AS-02

When windowId provided

8 fields

- sequenceId
- escalationDetected
- eventCount
- actionChain
- patternType
- consistencyScore
- firstDetectedAt
- layersInvolved

patternType

CONTAINED

Human-readable audit finding string

escalationDetected

true

ENRICHMENT LAYER

AS-03

Optional — when caller provides context

7 fields (all optional)

- identityRef
- assetRef
- sessionId
- serviceComponent
- tags

consistencyScore

94

Gate→['ISO42001-6.1.2','8.4','9.1']

schemaVersion

'1.0'

interface contract

ADR-006

AuditSignal Interface Contract

- docs/adr/ADR-006-audit-signal-schema.md
- Defines Urielle consumption boundary
- schemaVersion: '1.0' — forward-compat
- Boundary signals only — no internal state
- ISO 42001 control mapping per layer
- Separates EGS concerns from Urielle audit

ISSUES / DEFERRALS

I-01

WebSocket: socket.send TypeError

api/dist/server.ts

Deferred → Phase 06. UI polls; all 4 views functional

I-02

MODULE_TYPELESS_PACKAGE_JSON warning

egs/package.json

Informational. Add type:module or compile to JS in Phase 06

TORU-WILLIAM ALIGNMENT

- 14-field core
- CONTAINED patternType
- consistencyScore=94
- escalationDetected=true
- Boundary-only signals
- schemaVersion='1.0'
- ISO 42001 mapped
- ADR-006 written
